

NCISAA Member Schools Medical Care Requirements

ATHLETIC TRAINER REQUIREMENT/POLICY UPDATE REMINDER:

The NCISAA strongly recommends the presence of a Licensed Athletic Trainer or Athletic First Responder at all contests. Beginning in 2024-25, a Licensed Athletic Trainer or Athletic First Responder will be required at all practices and home contests for Boys Lacrosse, Football, and Wrestling. Member schools that have football will also be required to have an Athletic Trainer or Athletic First Responder travel to all away games. An Athletic Trainer is required for all NCISAA state playoff events with the exception of Golf.

While it is the strong recommendation of the Sports Medicine Advisory Committee that all NCISAA Member Schools hire a full time Athletic Trainer to cover all athletic activities, by the 24-25 school year, all NCISAA Schools must have an Athletic Trainer or Athletic First Responder for the following activities:

- All schools with a football program must have a licensed athletic trainer or athletic first responder present on site for ALL practices and games both home and away.
- A licensed athletic trainer or athletic first responder must be available and onsite during ALL wrestling practices and must be physically present in all competition areas during matches. Example: Wrestling in the Auxiliary Gym and Main Gym at the same time would require two licensed athletic trainers or athletic first responders or a combination of one of each.
- A licensed athletic trainer or athletic first responder must be present on site for all boys lacrosse practices and home games.
- A Licensed Athletic Trainer is required for all NCISAA state playoff events (with the exception of golf).
- The athletic trainer or athletic first responder may not have concurrent coaching responsibilities during the time in which the person is working as an athletic trainer or athletic first responder.
- If a school's Athletic Trainer or Athletic First Responder is unable to provide the NCISAA required coverage, the school may acquire the temporary services of a licensed healthcare professional (LHCP) as needed. **This person (LHCP) must be identified as the medical professional on site** and be aware of their responsibilities regarding the care of athletic injuries. Acceptable LHCP's include; MD, PA, AT, PT, RN, EMT. NOTE - If this LHCP will continue providing regular onsite coverage, they must meet the standards in place for AFR requirements.

Athletic First Responders Requirements:

- Must have completed and continue to maintain current certification in cardiopulmonary resuscitation and AED use, as certified by an organization such as the American red Cross or the American Heart Association
- Must have completed and continue to maintain current certification in first aid as certified by an organization such as the American Red Cross or the American Heart Association
- Must have completed the Athletic Injury Management Course offered by the NCCA at their annual meeting in July or have completed the Athletic First Responder Program offered by Pardee Sports Medicine at the NCISAA annual meeting in June. In addition, LHCP's may take the Emergency Response for Athletes course offered by Cogent Steps.
- Must complete a session offered at the NCISAA annual meeting on the specific Health and Safety Requirements for the NCISAA
- Must complete a minimum of 10 hours of continuing education each subsequent year

Athletic Trainer - a Licensed Health Care Profession in NC

- Athletic training encompasses the prevention, examination, diagnosis, treatment, and rehabilitation of emergent, acute or chronic injuries, and medical conditions. Athletic training is recognized by the American Medical Association (AMA), Health Resources Services Administration (HRSA) and the Department of Health and Human Services (HHS) as an allied health care profession.
- Athletic trainers are highly qualified, multi-skilled health care professionals who collaborate with physicians to provide preventative services, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. Athletic trainers work under a physician's direction as prescribed by state licensure statutes. In North Carolina, an athletic trainer is a person who, under a written protocol with a physician licensed under Article 1 of Chapter 90 of the General Statutes and filed with the North Carolina Medical Board carries out the practice of care, prevention, and rehabilitation of athletes' injuries. In carrying out these functions, they may use physical modalities, including heat, light, sound, cold, electricity, or mechanical devices related to rehabilitation and treatment.
- Licensed Athletic Trainer (LAT) – In North Carolina, a Licensed Athletic Trainer is an individual who is licensed under Article 34 of Chapter 90 of the General Statutes entitling them to perform the functions and duties of an athletic trainer.
